KEY BENEFITS
FOR OUR MERCHANTS

Start processing immediately

Low risk

High volume gateway can handle large volumes of transactions daily

Secure

Reliable

Cutting-edge technology

OUR TECHNOLOGY

API Integration
REST API provided based on the OpenAPI 2.0 specification, offering SDKs in multiple languages. We also offer event call-backs to improve the experience of your customers.

Back-office dashboard
Easy to use portal to monitor all payments and settlements in real time. All reports are fully exportable to enable efficient reconciliation with your own systems.
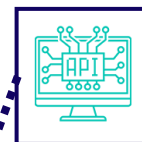

Analytics and reporting
Comprehensive updates to give a general overview of performance as well as granular reports which are made available via exports of raw data.

Dynamic tech team
Able to scale as quickly as you need and can instantly respond to market and customer demands. Our merchants trust our teams and our systems.

Reliability
All our systems are fully redundant, with no single point of failure. You can continue operating during a failure due to our servers running in multiple geographies.

Risk and fraud management
Your business is protected by our use of multiple fraud detection and screening tools, which adapt to the new techniques, devices and locations used by fraudsters.

Security
Continuously monitor and test our applications to ensure they are up-to-date and in line with the latest security guidelines. We audit and log all actions that take place on our customer accounts.
